

The Victoria & Stuart Project

Part 4

Testing what we make

Part 3

In part 3 of the project we will have come up with:

Ways to help people with learning disabilities plan for when they are going to die.

Resources that can help this (for example pictures, documents or videos).

Training for learning disability support staff.

In part 4 of the project:

30 staff members will test these ways of planning with people they support.

We will ask them what is good about them and what we should change.

Then we will put everything we have made on the internet, so everyone can use it.

There is more information about the rest of the study here. **To be done when domain is decided**
